

Design Science Portfolio Overview

Robert E. McCoy

Design Science Research and Innovation Portfolio

Artificial Intelligence · Education · Workforce Systems · Applied Innovation

A curated collection of research frameworks, data resources, and applied innovation artifacts exploring the integration of artificial intelligence across education, workforce development, and institutional systems.

Developed using a design science approach emphasizing applied frameworks, evaluation artifacts, and institutional integration.

RESEARCH PROJECTS AND INNOVATION ARTIFACTS

Career Mobility Governance Framework

Applied AI governance framework exploring decision-support integration across military education, workforce pathways, and institutional policy systems. Developed for presentation at the 2026 Council of Colleges and Military Educators Symposium.

robertmccoyprojects.com/cmzf

Design Science Research Portfolio

Central hub presenting research initiatives, knowledge systems, and applied innovation projects spanning artificial intelligence, education systems, and workforce development domains.

robertmccoyprojects.com

AI Education Research Collection

Curated reports, statistics, and analysis exploring artificial intelligence adoption across educational environments, instructional design, and institutional transformation.

robertmccoyprojects.com/education-ai

AI Workforce Development Analytics

Data-driven exploration of artificial intelligence impacts on workforce readiness, labor markets, and organizational transformation.

robertmccoyprojects.com/workforce-ai

Artificial Intelligence in Universities

Comparative analysis of AI implementation across higher education institutions, including governance considerations and emerging use case patterns.

robertmccoyprojects.com/universities-ai

Industrial AI Simulation Artifact

Interactive simulation demonstrating AI-governed industrial energy production within a connected infrastructure environment, illustrating closed-loop system regulation concepts.
