

Cybersecurity Awareness Training

Meridian Industrial Group | Annual Mandatory Training Module

Document ID:	MIG-TRN-CS-2025-004
Classification:	Internal
Effective Date:	January 2025
Owner:	IT Security Operations
Prepared By:	Information Technology Division

1. Training Objectives

Upon completion of this training module, all employees will be able to identify common cyber threats including phishing, social engineering, and malware attacks. Employees will understand their role in protecting organizational information systems and data. This training is mandatory for all Meridian Industrial Group employees and must be completed annually.

2. Phishing and Social Engineering

Phishing attacks use deceptive emails, messages, or websites to trick employees into revealing credentials or installing malware. Always verify the sender identity before clicking links or opening attachments. Report suspicious emails to the IT Security Operations Center immediately.

- Never share your password via email, phone, or chat, even if the request appears to come from IT or management.
- Be cautious of urgent requests for wire transfers, credential resets, or data sharing from unfamiliar contacts.
- Verify unusual requests from known contacts through a separate communication channel before taking action.

3. Password and Authentication Security

All corporate accounts require passwords of at least 14 characters combining uppercase, lowercase, numbers, and special characters. Multi-factor authentication is mandatory for all remote access, email, and administrative systems. Never reuse corporate passwords on personal accounts.

4. Data Handling

Handle all organizational data according to its assigned classification tier. Tier 3 and Tier 4 data shall not be stored on personal devices, transmitted via unencrypted email, or shared with unauthorized individuals.

5. Reporting Security Incidents

Report all suspected security incidents to the IT Security Operations Center within four hours of discovery. Employees who report incidents in good faith shall not face disciplinary action, even if the report turns out to be a false alarm.
